

Model Development Phase Template

Date	28 November 2024
Team ID	739771
Project Title	Deep Fruit Veg: Automated Fruit And Veg Identification
Maximum Marks	10 Marks

Initial Model Training Code, Model Validation and Evaluation Report

The initial model training code will be showcased in the future through a screenshot. The model validation and evaluation report will include a summary and training and validation performance metrics for multiple models, presented through respective screenshots.

Initial Model Training Code (5 marks):

Paste the screenshot of the model training code

```
class LR_ASK(keras.callbacks.Callback):
    def __init__(self, model, epochs, ask_epoch):
        super(LR_ASK, self).__init__()
        self.set_model(model)
        self.ask = ask_epoch
        self.epochs = epochs
        self.ask = True
        self.lowest_vloss = np.inf
        self.best_weights = self.model.get_weights()
        self.best_epoch = 1
        self.plist = []

    def get_list(self):
        return(self.plist)

    def on_train_begin(self, logs=None):
        if self.ask_epoch==0:
            print('you set ask_epoch=0, ask epoch will be set to 1',flush=True)
            self.ask_epoch=1
        if self.ask_epoch >=self.epochs:
            print('ask_epoch>=epochs, will train for',epochs,'epochs',flush=True)
        if self.epochs==1:
            self.ask=False
        else:
            print('Training will proceed until epoch',ask_epoch,'then you will be asked to')
            print('enter H to halt training or enter an integer for how many more epochs to run then be asked again')
            self.start_time.time()
```

Model Validation and Evaluation Report (5 marks):
